BACKGROUND:

- Kelly has been leading retreats for the past 15 years.
- As the owner and founder of 'Kundalini Fusion' Kelly leads retreats, works with individual clients, and facilitates yoga teacher trainings.
- She uses her spiritual intuition and psychic abilities to guide her clients and see where things are going wrong in their lives. She claims she can communicate with souls and eradicate negative energy.
- Kelly discovered her psychic abilities when she was a child. She often dreams scenarios that come to life the next day or week.
- Kelly often tells people she's "been through hell". Her childhood was filled with emotional, physical, and sexual abuse. As a result Kelly battled depression for most of her teen years and 20s.
- At the age of 26, Kelly learned that the man she called "Dad" for her entire life was not her biological father. Her mother's husband never showed her love or affection which left Kelly feeling worthless.
- After this shocking revelation, Kelly was heartbroken and confused with no idea where to turn.
- Then one yoga class changed her entire life. Kelly's healing powers slowly revealed themselves to her and she knew she was put on this earth to help others overcome their own personal demons.
- She's devoted her life to "the pursuit of deeper levels of consciousness and a journey of self-enlightenment and helping her friends, family and clients achieve the same."
- Kelly's retreats incorporate a wide variety of modalities- meditation, ceremony circles, reiki, yoga, hikes, ayahuasca ceremonies, cacao ceremonies, and more.
